RECEIVED

NOV 05 2002

TECH CENTER 1600/2000

13. (New) A method for derivation of an insulin-containing medicine for peroral use comprising

- excreting erythrocytes from fresh mammal blood,
- incubating the erythrocytes with insulin in the presence of a stitching agent to obtain immobilized insulin,
- washing the immobilized insulin with a physiological solution to obtain an insulin solution,
- adding a stabilizer to the insulin solution, and
